Permanent Link to Tersus GNSS RTK board launched for OEMs, system integrators
2021/05/25

Photo: Tersus GNSS Tersus GNSS Inc. has launched the BX306Z GNSS RTK board, which has powerful flexibility and compatibility to meet the needs of original equipment manufacturers (OEMs) and system integrators, according to the company. As a new member of the BX-series GNSS OEM boards, BX306Z is a cost-efficient GNSS real-time kinematic (RTK) board for positioning and raw measurement output. The board is a compact, multi-GNSS (GPS L1/L2, GLONASS G1/G2, BeiDou B1/B2) RTK module with centimeter-level accurate positioning capability. Features The BX306Z is able to integrate with autopilots and inertial navigation units. Log and command is compatible with major GNSS boards. With flexible interfaces, the pin-to-pin design is compatible with Trimble BD970. All of these features help manufacturers reduce their application cost and lead time to market.
